Translate the following passages and sentences into Arabic:

1

Over the years, a number of different economic ideologies and systems have been proposed and promoted. As with most other things in life, economic doctrines and systems have a limited shelf life and evolve with time. While in 2014 the mixed capitalist market system of the Western world, especially that in the United States, may appear preeminent, it received a number of shocks at its very foundation. The financial crisis of 2007–2008 with its extensive fallout and the rapid rise of China as an economic power have raised new and fundamental questions about the long-term direction and viability of the laissez-faire mixed capitalist system practiced in the United States and other Western nations. After World War I, economists generally realized that neoclassical economics was not well equipped to address the reasons underlying unemployment, business cycles, and their mitigation and amelioration.

**Bidding to be allowed for shares at the Cairo Stock Exchange
Financial Market Boss Says**

Financial Market department Chief denied that there was any real problem with the CSE. There was, however, a kind of anxiety, though hardly any regular risks, in the Egyptian market, he added. The Chairman of the SCE had been more of a project manager than a head of a Stock Exchange and had fulfilled the task of establishing an exchange system and a membership system for the mediating firms, he explained. What was needed now was to focus on the legislative and legal elements in the effective control of CSE transactions—a task entrusted to the new CSE chairman.

A new mechanism would be introduced into the Egyptian market, he said, by allowing bidding for shares. A number of potential buyers have approached the Financial Market Department, proposing to purchase a quantity of certain company shares at higher than current CSE prices. Such potential buyers would, he said, fix the purchase prices.
